

Písomná práca – rímske čísla – šmakocinka 2

1.Vypočítaj sčítacie pyramídy rímskymi číslami

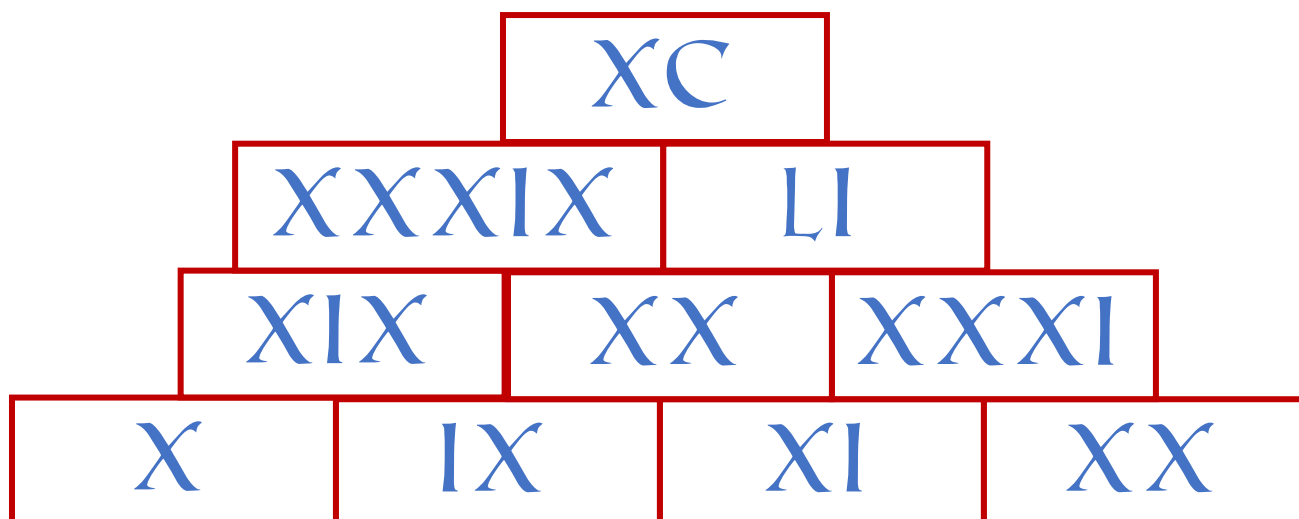

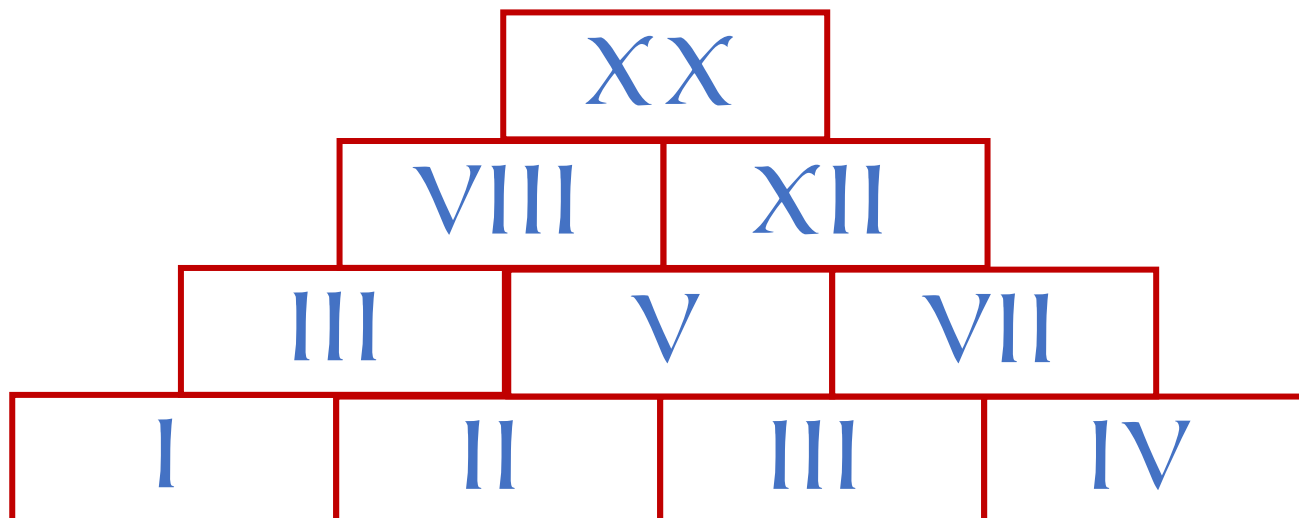

The image shows two addition pyramids. The first pyramid has four levels: the bottom level contains the Roman numerals I, II, III, and IV; the level above has three empty boxes; the next level has two empty boxes; and the top level has one empty box. The second pyramid also has four levels: the bottom level contains the Roman numerals X, IX, XI, and XX; the level above has three empty boxes; the next level has two empty boxes; and the top level has one empty box. The background is a detailed illustration of ancient Rome, featuring the Colosseum and various classical buildings.

Doplň rímske čísla v číselnom rade

L, XLV, XL, XXXV, _____, _____, _____

_____, DCL, DC, DL, _____, _____,
